StudioLive™ RM Mixer Series New Feature Release Notes

Firmware and build information:

Firmware Version: 1.0.5651
Universal Control AI Version: 1.6.0.30286 (Mac/PC) 1.1.2.30204 (iOS)

New Feature

Filter DCA groups: With the addition of our new Filter DCA feature, PreSonus® UC Surface™ for iPad is by far the most powerful, easy-to-use, battle-ready control mix software in this quadrant of the galaxy. Designed for StudioLive™ RM32AI and RM16AI Active Integration™, rack-mount digital mixers. UC Surface provides quick, intuitive access to everything you need during a live show (or studio session) so you can mix with confidence. Control every feature of the mixer, including the recallable preamps, from anywhere in the venue. Group channels into a single fader by creating Filter DCAs — now you can control only those channels and features you need at any given moment in the performance. Group Filter DCAs together into Group Master Views that let you overview the entire mixer at a glance, yet let you instantly jump in and out of component Filter DCAs or "drill down" the channels that comprise them.

Features:
- Battle-ready interface designed specifically for live sound mixing with two-touch access to most important features
- Complete overview of all input and outputs
- Filter DCAs consolidate channels for easy iPad control
- Master faders accessible at all times
- Contextual navigation for quick, intuitive access to all mixing functions: Fat Channel processing, graphic EQs, effects, channels, Flex Fader control over selected mix
- Identify channels with quick track-type icons
- Meter Bridge scroll bar
- Mix Select buttons with activity meters
- Device tabs
- Parameter boxes
- Contextual presets system: Presets filtered by channel types; quickly audition presets on the fly; edit, save, and load presets; and more
- 8 Quick Scenes, 8 Mute Groups
- Save and load scenes

New in UC Surface 1.2:
- Filter DCA feature with Automatic and Custom Filter DCA's
- Group Master View to access all Filter DCA masters at once — see and control only what you need at any time
- New Channel Types added
- Stereo Link channels create a single stereo channel
- Display HPF in EQ graph

REQUIREMENTS:

Recommended:
Compatible with iPad Air, iPad mini with Retina display, iPad (4th generation), and iPad mini. Requires iOS 7.03 or later.

Supported:
Compatible with iPad Air, iPad mini with Retina display, iPad (4th generation), iPad mini, iPad (3rd generation), and iPad 2. Requires iOS 7.03 or later.

iPad must be connected to the same wireless network as a StudioLive RM-series digital mixer.
